After completing your order, you will receive an order confirmation email showing the download link so you can get notes. To transpose, click the icon at the bottom of the viewer. If transposition is available, different options for transposition of half-tones will appear. Options: not, the notes icon will remain dimmed. Most of our scores are transposable, but not all of them, so we recommend you check this before making your online purchase. You can do this by checking the bottom of the viewer, which displays the notes icon. If it is completely white, just click on it and the following options will appear: Original, 1 Semitone, 2 Semitones, 3 Semitones, -1 Semitones, -2 Semitones, -3 Semitones. This means that if the composers' names and music, Charlie Puth and Jacob Hindlin began the song in the original key to the result of C, 1 Semitone means transposition of C#. If you originally selected a -1 semiton for result C, transposition B will be made. First, be careful not to transpose and then print (or save as PDF). When this song was released on 05/02/2017 it was originally posted at key F. * Not all of our sheet music is portable. To check if Attention can be transferred to different keys, check the note icon at the bottom of the page music viewer as below screenshot shown. Just click on the icon, and if additional key options appear, then apparently this page music is transposed. Also, unfortunately not all sheet music is playable. If the play button icon is gray unfortunately this result does not contain playback functionality. ** One print order can be printed or saved as a PDF. Chosen by our editorial team. You can print a page of music, beautifully reproduced by Sibelius, up to three times. You can print a page of music from our website, or from Gaming Mac and PC applications. We'll follow all your purchases so you can return in months or even several years, and we'll still have your library available to you. By downloading Gaming Sessions (FREE), and connecting your MIDI keyboard, you will be able to practice attention in Charlie Puth's section. With the playground, you are able to determine which finger you should use, as well as an on-screen keyboard that will help you set the right keys to play. You can also slow the temp way down, which is great for learning a new song. At the end of each practice session, you'll see an accuracy score and the program will record it so you can monitor your progress over time. Finally, once you've mastered Attention, you can record yourself playing it and share it with friends and family. Family.
